Green Bay Harbor - Bayport CDF

Project Features

- Green Bay Harbor - Bayport CDF is an in-lake facility attached to land located in Green Bay, WI. The CDF is situated west of the mouth of the Fox River and bordered on the southwest by Interstate 43.
- Navigation Project Served: Green Bay Harbor
- The CDF was constructed in 1977 under authority from Section 217 and has more than ten years of capacity remaining.
- Bayport CDF has an area of 125 acres, has a total capacity of 2,500,000 cubic yards, and receives about 150,000 cubic yards annually.
- The CDF is owned by the City of Green Bay and is operated by the US Army Corps of Engineers.

Beneficial Use Information

- The material in this site has a fine grain size.
- Direct transportation access to the CDF is available via road in addition to possible transportation access by rail within one mile of the site.
- The US Army Corps of Engineers has the authority to remove or sell material from this CDF. Interested parties can contact Mr. James Bonetti at James.A.Bonetti@usace.army.mil.

Post Closure Use

- The post closure use of Green Bay Harbor - Bayport CDF is intended for material recycling.
